

# Barclays Innovation Campus

## Furniture Installation, Glasgow

Barclays invested heavily in their Innovation Campus in Glasgow, which comprises 3 major buildings containing 5000 workstations over 18 floors in the heart of the city. Due to our track record of success on large installation projects together with our professional planning submission, Heartwood Installations were selected as the installer of choice for the installation of the height adjustable desking solution.

Our team excelled both on and off-site, despite unprecedented challenges to logistics services and supply chains. We worked around site delays and access issues to hand over each floor on time for occupation at the agreed end date for each phase.

This project was led by our Project Manager Mark Kane, who utilised his extensive knowledge of on-site management to ensure the furniture installation within these buildings was completed with zero snags and zero downtime. His reassuring presence on-site left the client knowing the project was in capable hands, and his regular and detailed feedback enabled them to make decisions driven by data and an accurate and up to date position of the reality on-site.

## Client Feedback

"5000 workstations would challenge any contractor, but Heartwood met the challenges at every stage and

## Date Of Works

**January to November 2021**
