

# Incremental Group

## Installations and Furniture Top-Ups, Glasgow

Heartwood were the supplier of choice for both the furniture installation and subsequent top-up projects within Incremental Group's home at the Garment Factory.

We installed new desking and loose furniture product within our first visit, ensuring all products were installed professionally as per the floor plans to match the clean and modern look which Incremental had created for their new home.

On a later top-up project, we dismantled, moved and rebuilt existing furniture from the first project within the building to create space for the installation of more newly purchased furniture as part of an internal expansion and repurposing project. We moved complex systems between the 3rd and 5th floor without the use of a lift, then backfilled the space created with new furniture. The client was delighted with Heartwood's professional approach, success on-site and the can-do attitude displayed by the team in both their fitting and portering tasks.

## Date Of Works

March 2021

## Client Feedback

"Incremental Group trust Heartwood implicitly to understand the brief of a project and get it done on time and on-budget."
